**B. K. KAUL,  
Prof. & Head of the Civil  
Engineering Department  
Regional Engineering College,  
Kurukshetra.**

I am very much pleased to know that the final year students of this College are publishing a Souvenir. This is the first batch of B.Sc. Engineering students who would be soon graduating from this College. During their stay here, the College grew from practically nothing to a full fledged institution. These students have had to face considerable difficulties in their day to day activities in the College and the hostels. It goes to the credit of these students that they have shown an excellent behaviour and have contributed very much to the development of this College. They have exhibited a high standard of academic performance. I hope wherever they go they would work with the same amount of zeal and intelligence and bring credit to this College. Being engineers they would be contributing very much to the growth of the country and I wish them all success in their future careers.
